

Upgrade of the luminaires with electronic ballast circuit

Installation must be performed by a qualified electrician
Change of wiring - Yes

Connection example in accordance with DIN EN 62776:2015.

- (1) Turn off power supply, remove fluorescent tube.
- (2) Remove the old luminaire ballast.
- (3) Rewire the luminaire with single side power input.
- (4) Place the new T5 LED tube, keeping in mind the single side input.
- (5) Lock the LED-tube by 90° rotation – switch on the power.
