Read these instructions before installation and retain for future reference
This equipment should be installed by a competent electrician

Important Information

We recommend that luminaires are installed by a qualified electrician ensuring the installation complies with current IEE wiring regulations BS7671:2018 & local building control.

- All tests should be carried out in accordance to EN 50172:2004.
- BELL will not accept responsibility for any claims arising from poor installation.
- The light source of this luminaire is not replaceable, when the light source reaches end of life, the whole luminaire must be replaced.

Important User Advice

- The ambient room temperature should not exceed 35°C.
- Ensure that there is adequate free air ventilation around the fitting.
- Always switch off mains supply before installing.

This product may contain substances that can be hazardous to the environment if not disposed of properly. Electrical and electronic equipment should never be disposed of with general household waste but must be separated for its correct treatment and recovery. Where possible recycle your packaging.

1. Fit the L brackets into position on the back of the panel, as shown in the photo below, utilising the screws already in situ. Spares screws are provided in the 10118 pack should you require them.

3. Thread the four steel wires through the small hole in the L brackets.

2. Fix the ceiling brackets into place, using the long screws and wall plugs provided.

4. Push the steel wires into the ceiling brackets. These will lock automatically.

5. To remove the steel wires from the ceiling brackets, push the central stem upwards, whilst gently pulling the cable downwards.
