Important Information

We recommend that luminaires are installed by a qualified electrician ensuring the installation complies with current IEE wiring regulations & local building control.

- On emergency fittings, all tests should be carried out in accordance with current emergency lighting regulations.
- BELL Lighting will not accept responsibility for any claims arising from poor installation.
- The operating temperature should be between -20°C and 35°C, and 0°C and 35°C for emergency fittings.
- Ensure that there is adequate free air ventilation around the fitting.
- Do not cover with insulation.
- Always switch off mains supply before installing or opening to change the settings.
- Upgrade of the MCB may be necessary.
- Mount to a stable, secure surface that is rated for the weight of the luminaire.
- Ensure all earth connections are secure, and the luminaire is effectively grounded.
- Not suitable for ATEX hazardous zones (explosive atmospheres).
- To ensure optimum performance, keep the front diffuser clean. Wipe with a soft, damp lint free cloth. Do not use soaps, detergents, solvents or abrasive materials.
- On emergency versions, only use battery as supplied.
- On emergency versions, allow the battery to fully charge for 24 hours before performing the initial discharge test.
- If the lighting fails within 3 hours of an emergency discharge test, the battery is to be replaced. Contact your local distributor for a suitable replacement.
- Not intended for use by children.

This product may contain substances that can be hazardous to the environment if not disposed of properly. Electrical and electronic equipment should never be disposed of with general household waste but must be separated for its correct treatment and recovery. Where possible, recycle your packaging.

Read these instructions before installation and retain for future reference
This equipment should be installed by a competent electrician

This luminaire contains a light source with Energy Rating B
