middle
connector

Tools for installation

electric drill

drill bit

screw driver

Specification :

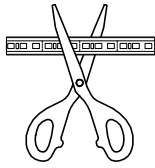

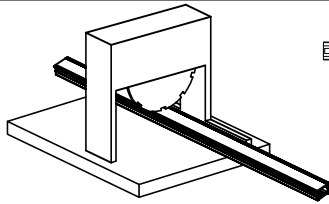

Voltage: 24Volt

Watts per metre : 7W p/m

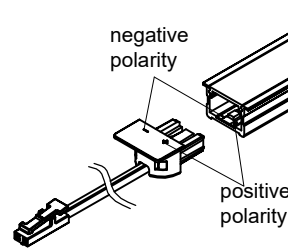

Dimmable: Yes via mains dimmable drivers or smart control systems.

IP Rating : IP20

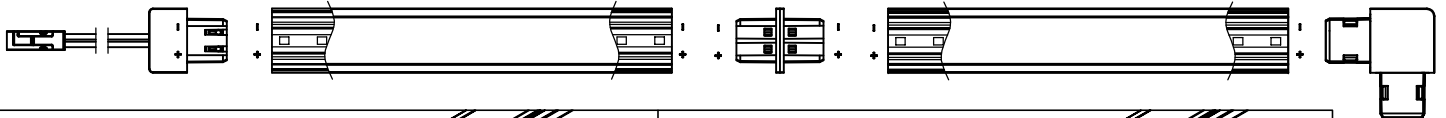

Cable Length- Purchased Separately

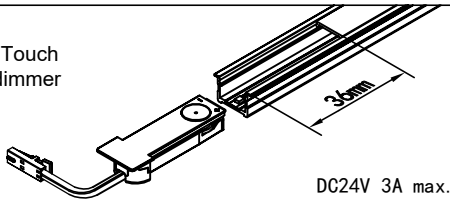

Cuttable every group
(1 diode and 1
resistor) to avoid
waste and reduce
dark area. Once cut,
clear any debris
from inside the profile

Insert the connector into the
lamp body, connect it to the
LED driver and power on to
make sure lamp works
normally. (Note the positive and
negative polarity connection)

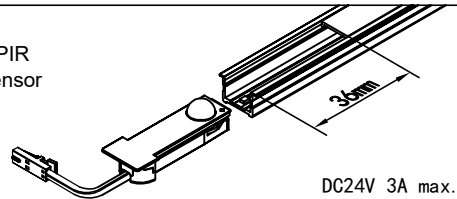

SY2480-TS Touch
switch and dimmer

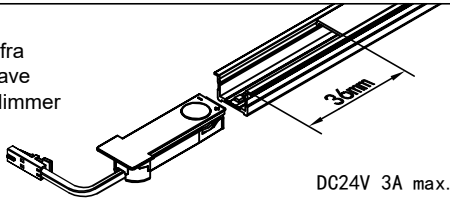

DC24V 3A max.

SY2480- PIR
Motion Sensor

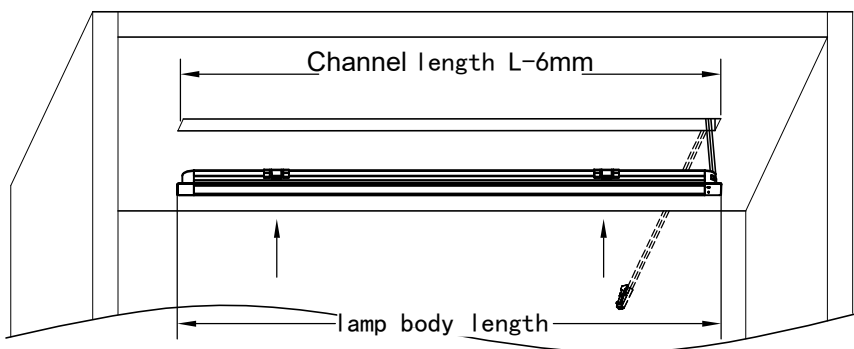

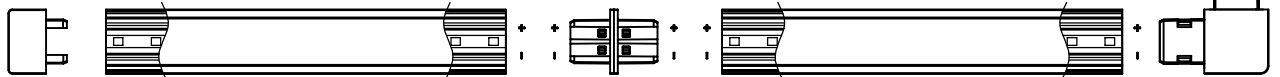

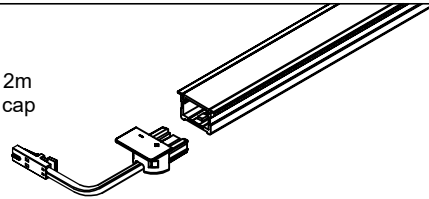

DC24V 3A max.

SY2480IR Infra
Red Hand wave
sensor and dimmer

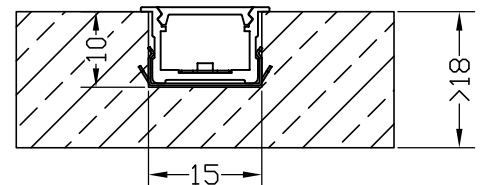

DC24V 3A max.

SY2480EC
Quick Connect 2m
Cable and end cap

1. Make recess for lamp body and wire on the surface with milling tool.
2. Drill hole for wire with a milling tool on the board surface.
3. Clamp the lamp body into the slot as picture shown
