ULTRONIC Premium

HIGH SPEED HAND DRYER

PRODUCT-NO.: 205633

Opt for hygiene in a stylish design

Our high speed hand dryer covers two important hygiene factors: dry hands and clean air. Drying your hands needs to be fast on busy workdays. So it's good to know that the appliance takes less than twelve seconds to dry the hands of your guests or staff. The contactless, infrared control of the hand dryer ensures economical operation and dries hands more hygienically at the same time. Ideal if you want to meet the high requirements for sanitary facilities in restaurants, the commercial sector or public buildings. The additional heating function increases convenience. Without heating, on the other hand, you save energy. By the way, in "silent mode" the appliance works more quietly, which is an advantage in schools or offices.

Convenience for clean air and dry hands

Do you want to regularly purify the ambient air with UV-C light and an ion generator? Simply activate the function with the corresponding switch. The appliance will then run at reduced speed for one hour, purifying the air. There is then a one-hour pause before the air is purified again. This means you can say goodbye to dust, pollen, bacteria and viruses in your sanitary facilities. For particularly high purity requirements, use the HEPA filter supplied. The appliance can be used to dry hands at any time, even in cleaning mode.

Combine stability and elegance

With all its technical advantages, a hand dryer should also look good in your washrooms. The brushed stainless steel casing gives this appliance a particularly modern and elegant appearance. Our hand dryers are robust and therefore vandalism-proof as standard.

The main features

- Extremely short drying time of less than twelve seconds
- Energy efficient use thanks to infrared proximity sensors

Hygienic hand drying with clean air thanks to HEPA filter

Even more pleasant hand drying due to add-on heating element

Practical air purification by means of UV-C light and ion generator

Vandalism-proof due to impact-resistant casing made of brushed stainless steel

Type	ULTRONIC Premium
Part no.	205633

Technical data

Power supply	1/N/PE ~ 220-240 V
Rated voltage	230 V
Frequency	50/60 Hz
Rated current	3,1 A
Rated output	720 W
Operating noise	76 dB(A)
Air speed	96 m/s
Air flow rate	84 m³/h
Drying time	12 s
IP rating	IP23
Protection class	I
Casing material	Stainless steel
Colour	Stainless steel
Height	309 mm
Width	272 mm
Depth	132 mm
Weight	4.00 kg
