APP	/	Tuya Smartlife
MADE IN PRC		

FEATURES

Remote Control:

Users can control all types of home electrical appliances through through kinetic wireless switch and Smart life App, enabling remote operation anytime and anywhere as long as the device is connected to the network.

Smart Version:

The system is equipped with various timing functions, including scene timing, switch timing, and delay timing, allowing users to set and execute scheduled tasks according to their personal needs.

Power-off Memory:

The system has a power-off memory feature that automatically restores the state before the power was disconnected when the socket is reconnected, ensuring that users do not need to reset the device to continue operating according to previous configurations.

Network Disconnection Memory:

Even if the network connection is interrupted, the system can still maintain the normal execution of the timing function, ensuring that the scheduled tasks set by the user are not affected by the network status.

FUNCTION DESCRIPTION

Smart WiFi App controls the actual use operation:

1. First download the "Smart Life" App on your mobile phone, which can be downloaded for free in all major app stores, and install it directly after the download is successful. (Scan the code to download the App)
2. After installation, register an account and log in to the interface at the same time.

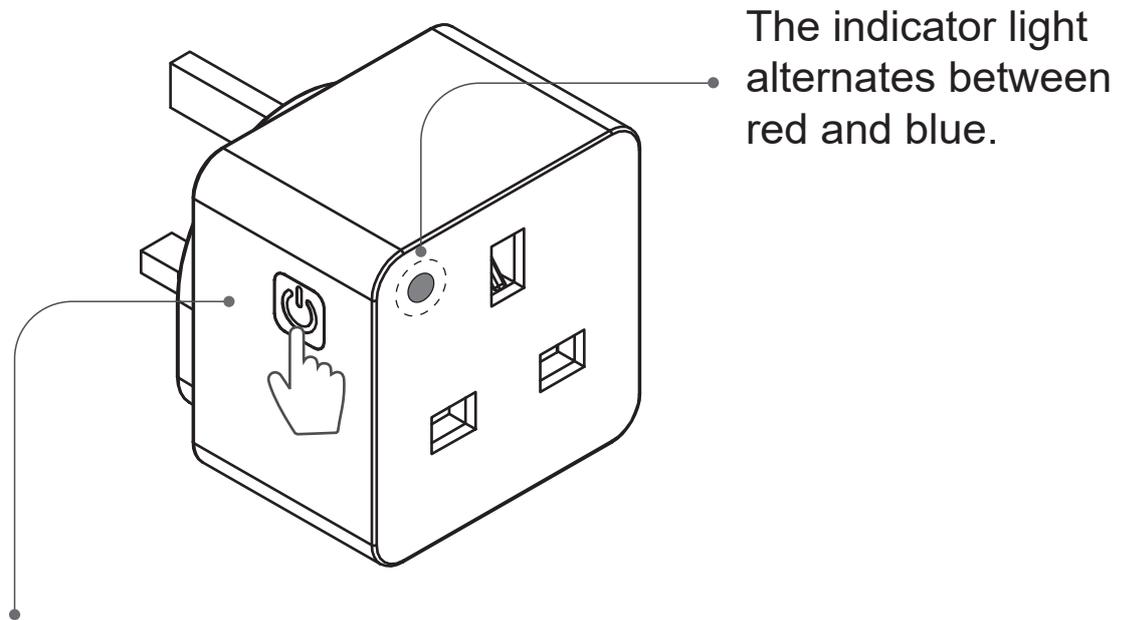

Scan the QR code to download the app.

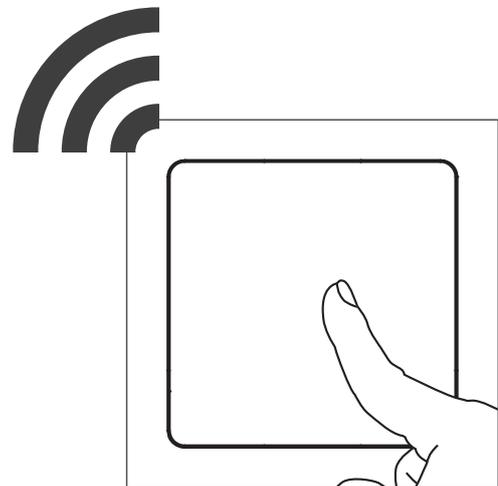

EQUIPMENT CONNECTION

RF 433

After powering on, press and hold the pairing button for 3-5 seconds. The indicator light will alternate between red and blue, indicating that the device has entered Switch & Remote pairing mode.

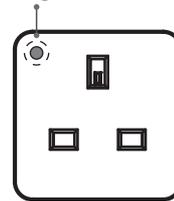

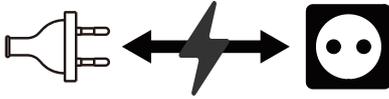

Kinetic Switch

In RF 433 pairing mode, once in pairing mode, simply press any button on the kinetic switch to complete the pairing.

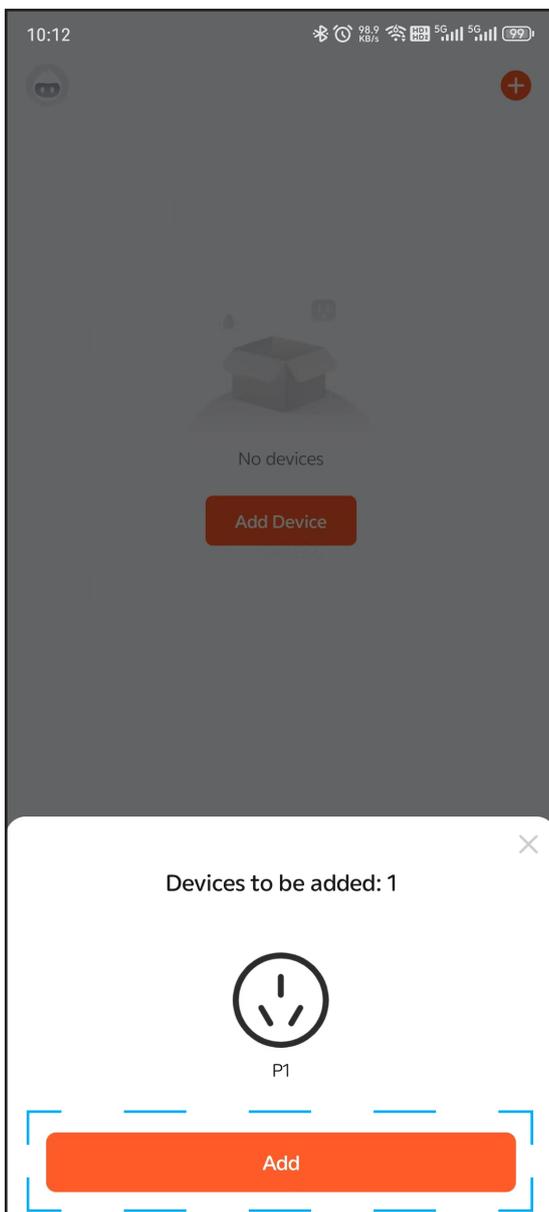

APP

After powering on, if the indicator light flashes red rapidly, the device has entered APP pairing mode.

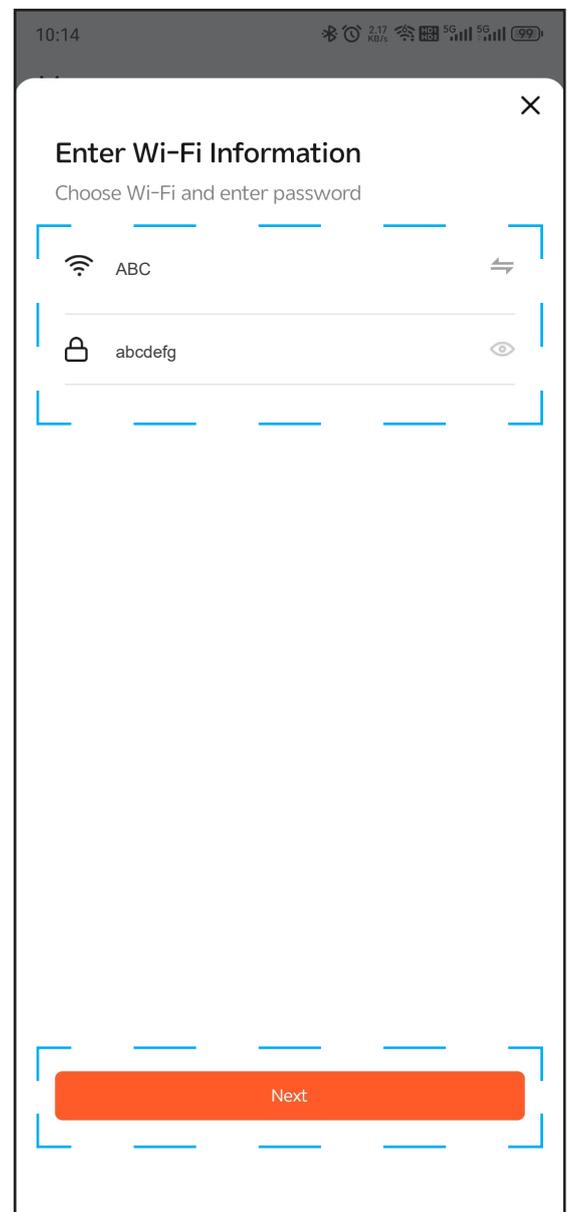

The indicator light flashes red rapidly.

1. After opening Tuya Smart, the app will automatically detect the smart plug in pairing mode. At this point, you can follow the prompt and click **[Add]**.
2. Select and connect to the 2.4 GHz Wi-Fi network.

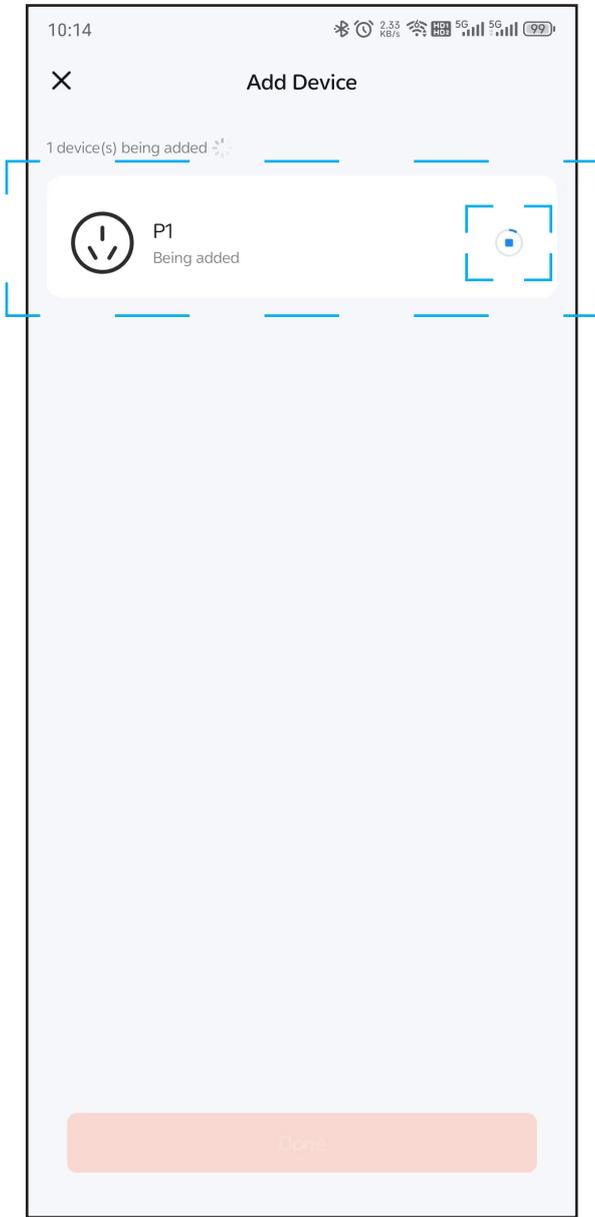

1.

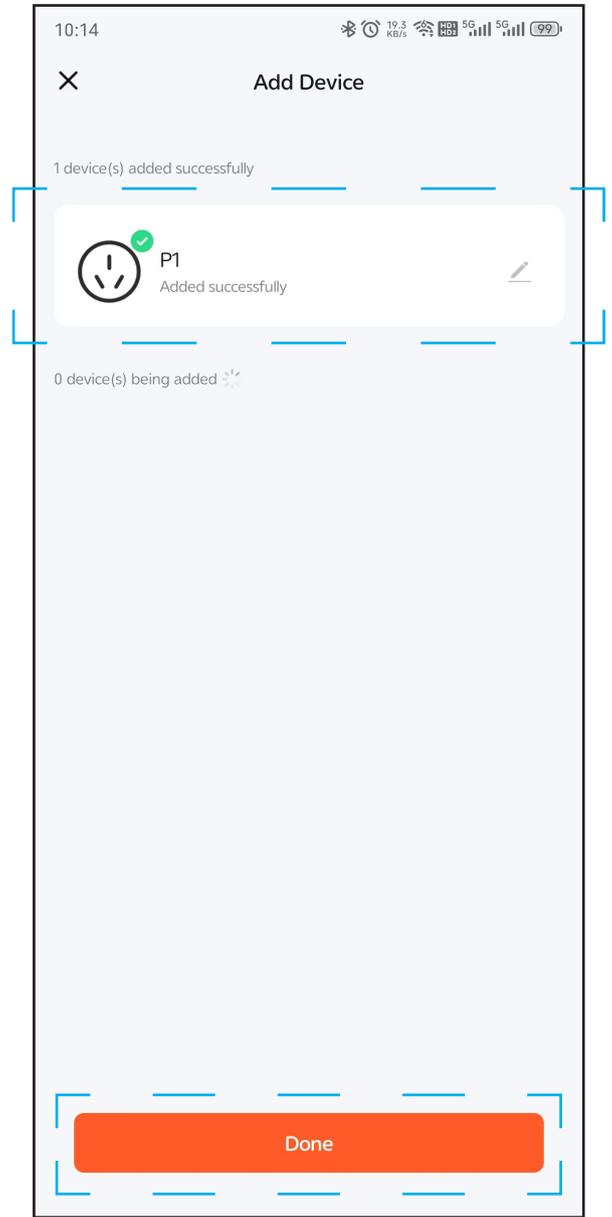

2.

3. Wait for the smart plug to complete installation.
4. Once the installation is complete, click [Done].

3.

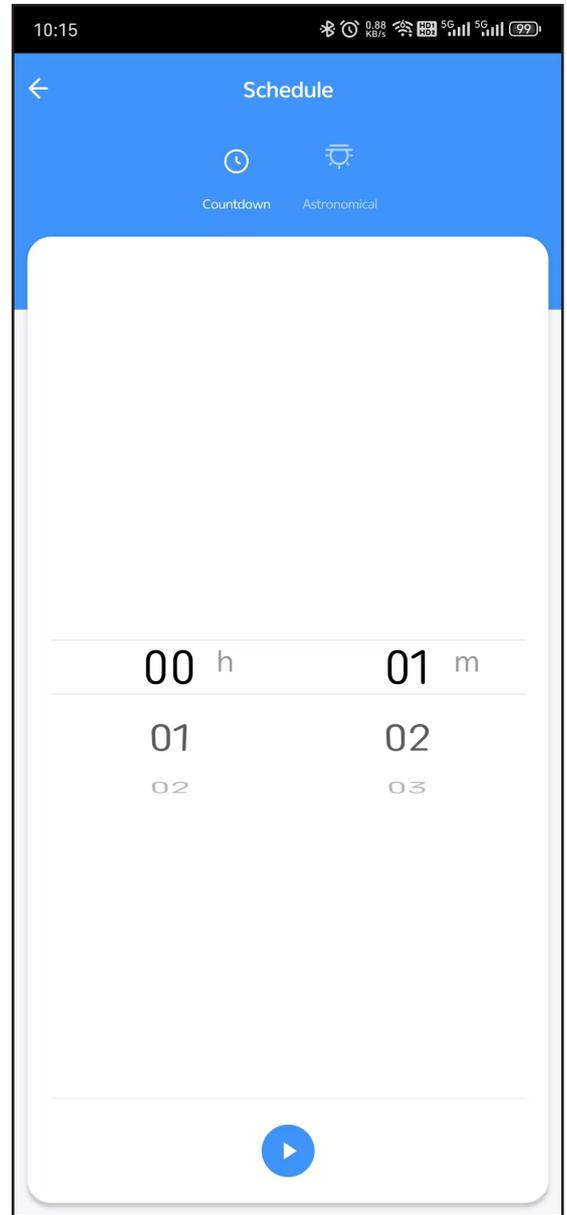

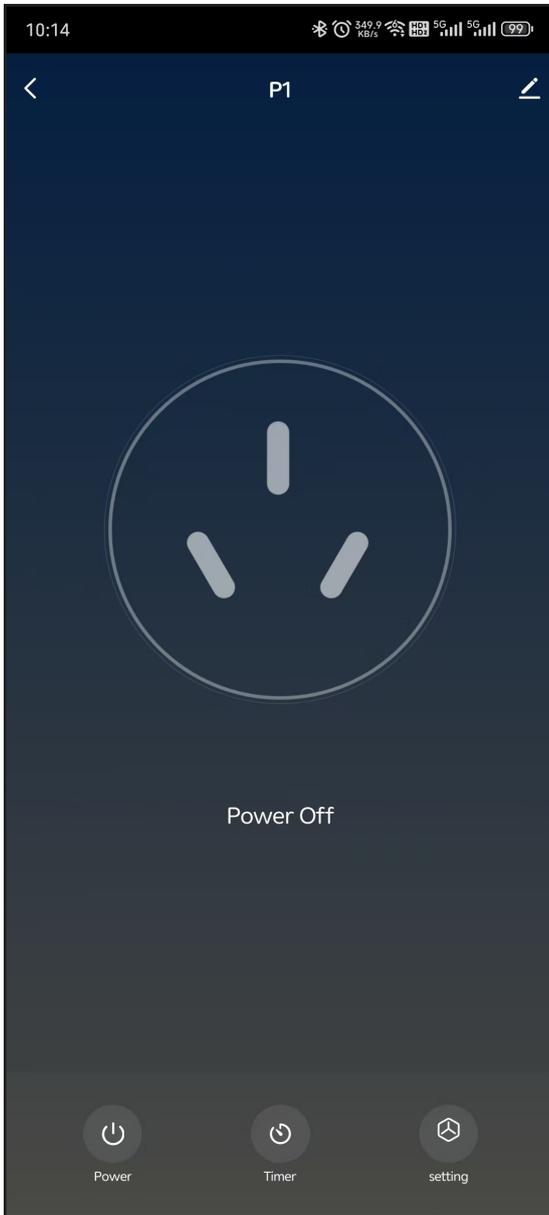

4.

5. Pairing complete!

After pairing is complete, you can enter this interface to use the direct on/off and timer switch functions as needed.

RF 433 code clearing

Long press the pairing button for 5-7 seconds, then release it to clear the pairing with the RF 433 transmitter.

App code clearing

Long press the pairing button for 10-15 seconds until the indicator light turns off to clear the pairing with the app.
